

Garment Steamer Brush with Water Reservoir

This handheld steam brush is designed for garment care. It features a water reservoir, visible water level indicator, steam head, and integrated brush attachments for smoothing and refreshing fabrics.

Product Overview

Professional Garment Care

This high-performance garment steamer brush is designed for quick and efficient fabric care, featuring a rapid 35-second heat-up time. With a powerful steam rate of up to 32g/min and a 220ml water tank, it is perfect for smoothing wrinkles and refreshing garments on the go. The intuitive design includes safety features like auto-shutoff and a steam lock for continuous operation, ensuring ease of use for professional or home environments.
