

Gas and Diesel Generator

This generator is designed to operate on gas, dual fuel, or diesel. It is engineered for robust and reliable power output in demanding applications.

Overview

Industrial Power Generation Solution

This industrial-grade generator set offers versatile power generation capabilities, supporting natural gas, biogas, dual-fuel, and diesel configurations. Built upon advanced military engine technology, the system is engineered for high strength, reliability, and longevity in demanding environments. It features a compact design that balances high electrical efficiency with low noise output and excellent fuel economy.

Technical Specifications

Compatible Fuel Types	Natural Gas, Biogas, Dual Fuel, Diesel
Engine Technology Basis	MTU 396 Military Engine Technology

Key Features

Performance Advantages

- Compact volume
- Low noise operation
- High power output
- Lightweight design
- High electrical efficiency
- Long service life

Suitable Applications

Industrial • Commercial • Prime Power • Backup Power • Combined Heat and Power (CHP)
