

# Gas and Electric Combination Stove

This integrated stove combines a gas hob and an electric oven. The gas hob includes two burners with cast iron grates, while the electric oven offers multiple cooking functions and a digital display.

## Product Overview

### Smart Integrated Stove Technology

This advanced integrated stove combines a gas hob, electric oven, and intelligent control systems into a single, cohesive unit. Designed for modern kitchens, it features voice and app-based interaction, automated heat control, and comprehensive safety protocols like automatic shut-off. The sleek, knob-free design utilizes touch-screen technology for intuitive operation and effortless cleaning.

## Performance & Control

### Thermal Load

**5.23 kW**

Max Heat Output

**0.4 kW**

Min Heat Output

### Flame Technology

15.5mm internal rotation low flame

## Smart Features

### Intelligent Capabilities

- Automatic air volume adjustment based on flame intensity
- Automated cooking stages via smart recipes
- Remote power off and monitoring
- Voice-guided cooking prompts

### Control Interfaces

Voice Control, App Control, Touch Screen, Mini-program Control

## Safety Systems

### Safety Mechanisms

- Automatic shut-off for unattended cooking (20-90 min timer)
- Flameout protection
- Gas leak alarm
- Firewall protection

## Design & Maintenance

### Design Features

Knob-free • Full Screen Mirror Panel • Pressure-sensing Touch • Easy Clean

### Cleaning Time

15 seconds

## Power & Utility

Power Source	Plug-in with backup power unit
Emergency Operation	Yes
