

Gas Flow Meter with Digital Display

This meter measures gas flow in industrial and commercial applications. It features a mechanical counter for cumulative volume and a digital display for precise measurements.

Overview

Industrial Gas Flow Monitoring

This gas flow meter is designed for professional industrial and commercial applications requiring precise consumption monitoring. It features a robust gray enclosure with standard threaded connections for seamless integration into existing gas lines. The device combines a reliable mechanical counter for cumulative volume tracking with a high-accuracy digital display for real-time measurements.

Technical Specifications

Display System	Mechanical Counter, Digital Display
Enclosure Type	Robust gray industrial enclosure
Connection Type	Threaded connections

Key Metrics

Device Identification Data

Identifier Type	Value
Model/Series	CZ-MA
Serial Number	00002240
Unit/Batch ID	0000001
