

Gas Generator Set, 5kW to 1000kW Power Range

Gas generator sets offer a power range from 5kW to 1000kW. These sets are suitable for various gas sources, including natural gas, biogas, oil field gas, biomass gas, and coal mine gas.

Overview

Professional Power Solutions

These high-performance gas generator sets are designed for reliable continuous power generation across a wide capacity range. Engineered for versatility, they accommodate various gas sources including natural gas, biogas, and coal mine gas for diverse industrial and commercial applications. With advanced control systems and robust build quality, these units support complex setups such as parallel operation, grid-connected power stations, and efficient cogeneration projects.

Technical Specifications

Power Range

5 kW Minimum Power	1000 kW Maximum Power
------------------------------	---------------------------------

Compatible Fuel Sources

- Natural Gas
- Biogas (Industrial, Landfill, Animal Husbandry)
- Oil Field Gas
- Biomass Gas
- Coal Mine Gas

Certifications

Compliance and Quality Marks

ISO 9001, ISO 14000, ISO 18000, CE, SASO, SABS
