

Gas Nail Gun Cylinder Sleeve

This cylinder sleeve is designed for gas nail guns. It provides a secure and reliable housing for the cylinder, ensuring efficient gas compression and consistent nail driving force.

Product Overview

Precision-Engineered Cylinder Sleeve

This cylinder sleeve is a vital component designed specifically for gas nail guns, ensuring optimal performance in pneumatic nailing applications. It provides a secure, reliable housing for the cylinder, which is essential for efficient gas compression and consistent nail driving force. Constructed from high-grade materials, the sleeve is built to resist wear, corrosion, and impact, significantly extending the service life of your tool.

Technical Specifications

Part Markings

- ZII
- 20

Material Characteristics

Wear-resistant, Corrosion-resistant, Impact-resistant

Surface Finish

Smooth internal surface to minimize friction

Performance Metrics

Operational Benefits

100 %

Gas Compression Efficiency
