

Gas-Powered Hedge Trimmer with Dual-Action Blades

This gas-powered hedge trimmer is designed for efficient and precise hedge trimming. It delivers powerful cutting performance for tackling thick branches and overgrown hedges with its durable, dual-action blades.

Product Overview

Professional Hedge Trimmer Performance

This gas-powered hedge trimmer is engineered for high-performance hedge maintenance, featuring a robust gasoline engine capable of handling thick branches and dense overgrowth. Equipped with professional-grade dual-action blades, it ensures clean, precise cuts while minimizing vibration to reduce operator fatigue during long shifts. The ergonomic, balanced design provides superior control, making it an ideal solution for both commercial landscaping and intensive residential garden maintenance.

Technical Specifications

Blade Technology	Dual-action
Power Source	Gasoline Engine

Safety & Features

Ergonomic Highlights

- Balanced weight distribution
- Reduced vibration system
- Comfort-grip handles

Safety Equipment	Blade Guard, Throttle Lock
