

Gas-Powered Lawn Edger with Adjustable Cutting Depth

This gas-powered lawn edger features a durable metal blade for precise edging along sidewalks, driveways, and flower beds. Designed for ease of use, it includes an adjustable cutting depth and a sturdy frame for stability.

Product Overview

Professional Lawn Edging Solution

This gas-powered lawn edger is engineered for precision and durability, making it an essential tool for maintaining clean edges along sidewalks, driveways, and garden beds. Powered by a reliable 4-stroke, air-cooled engine, it delivers consistent performance with an adjustable cutting depth to suit various landscaping needs. Its robust gear-drive transmission ensures efficient power transfer, providing professional-grade results with ease and maneuverability.

Engine Specifications

Engine Model	WL139F
Engine Type	4-stroke, air-cooled
Displacement	31 cc

Performance Metrics

Power Rating

0.7 kw

Power

6500 rpm

Rated Speed

Engine Idle Speed	3000 rpm
