

Gas Powered Snow Blower

This snow blower is designed for efficient snow removal with a 56 cm working width and 50 cm working thickness. It is powered by a 6.5 hp engine and has a 3.6 L fuel tank capacity.

Product Overview

High-Efficiency Snow Removal

This gas-powered snow blower is engineered for reliable and efficient snow removal in harsh winter conditions. It features a robust 6.5 hp engine and a self-propelled drive system with multiple gear settings for improved maneuverability. Designed for professional use, this unit provides the traction and power necessary to clear snow paths effectively.
