

Gas Proportional Control Valve

This gas proportional valve is engineered for precise gas flow control in household electrical appliances. It features a durable metallic construction with integrated solenoid actuators for reliable electronic regulation.

Product Overview

Precision Gas Flow Control

This gas proportional control valve is designed for precise regulation of gas flow in various household electrical appliances. Featuring a robust metallic construction and integrated solenoid actuators, it ensures stable and excellent performance. Its compact design allows for easy integration into existing systems while maintaining high standards of reliability and safety.

Technical Specifications

Construction	Forged metallic structure
Control Method	Electronic solenoid actuator
Key Features	Compact Structure, Stable Performance, Electronic Control
Primary Application	Household electrical appliances
