

Gas Pump Five-Footed Base

This gas pump base features a five-footed design for enhanced stability. Constructed from durable materials, it provides a secure mounting point for various gas pump models.

Product Overview

Gas Pump Five-Footed Base

This five-footed base is engineered to provide exceptional stability and support for gas pump installations. Its specialized five-footed design ensures even weight distribution, which significantly minimizes the risk of tipping or movement during operation. Built to withstand demanding environments, it serves as a solid, reliable foundation for various gas pump models.

Technical Specifications

Model Number	JA-R005
Design Features	Five-footed base, Central mounting point, Even weight distribution
Application Compatibility	Compatible with various gas pump models
