Product Overview

High-Performance Gas Spring Struts

These gas springs, also known as gas struts or pistons, provide reliable support and controlled motion for a wide range of applications, including furniture cabinets, automotive parts, and industrial equipment. Engineered for durability, they utilize compressed gas to ensure smooth opening and closing of doors and hatches. With a robust construction and multiple configuration options, these struts deliver consistent performance and safe operation for your assembly needs.

Technical Specifications

Available Lengths

- 6 inch
- 8 inch
- 10 inch
- 12 inch
- 14 inch

Available Colors

Silver • Black

Force Ratings

50N, 60N, 80N, 100N, 120N, 150N

Material Composition

Steel, SS304, SS316

Quality & Compliance

Cycle Life

100000 times

Tested Cycles

Certifications

ROHS, SGS Certified

Installation & Usage

Maintenance Note

Do not add lubrication, oil, or similar substances to the mechanism.
