Product Overview

Comprehensive Gas Water Heater Component Kit

This professional-grade component kit is designed for the assembly and maintenance of residential gas water heaters ranging from 5L to 16L capacities. The kit features essential safety mechanisms, including flameout and anti-dry burning protection, ensuring reliable and secure operation. With specialized winter and summer settings, this system provides optimized hot water performance for any climate.

Performance Specifications

Supported Capacity

5 L

Min Capacity

16 L

Max Capacity

Safety & Control

Integrated Safety Protections

Flue-blockage protection, Over-heating protection, Flameout protection, Anti-dry burning protection, Over water pressure protection

Control Settings

Available Operation Modes

- Winter mode
- Summer mode
- Minimum adjustment
- Maximum adjustment
