

# Gas Water Heater Control Valve

This valve controls the flow of gas to the water heater burner for safe and efficient operation. It includes a pressure regulator to maintain consistent gas pressure and a solenoid valve to shut off the gas supply in case of a malfunction.

## ADDITIONAL IMAGES

## Product Overview

### Gas Water Heater Control Valve

This high-performance control valve is designed for reliable gas regulation in water heater systems. It features advanced solenoid technology for precise flow control and is available in configurations suitable for both zero water pressure and standard pressure environments. Built with durable materials, it ensures safe and efficient operation across varying gas types and thermal conditions.

## Technical Specifications

Compatible Gas Types	Natural Gas, LPG, Manufactured Gas
Gas Valve Diameter	18 mm
Solenoid Voltage	< DC3V
Air Tightness Leakage	< 0.03 L/H
Operating Temperature Range	-20 to 60 °C

## Performance Comparison

### Performance Comparison

Feature	Zero Pressure Valve	Standard Valve
Start Pressure	e 0.02MPa	0.01 - 0.05 MPa
Relief Valve Device	Not Included	0.9 ± 0.05 MPa
