

Gasoline Backpack Power Sprayer

This backpack power sprayer is powered by a gasoline engine for agricultural and gardening use. It features a high-pressure pump system and adjustable nozzle for the efficient spraying of pesticides, herbicides, and fertilizers.

Product Overview

Professional Backpack Power Sprayer

This gasoline-powered backpack sprayer is engineered for high-efficiency liquid application in agricultural and gardening environments. Featuring a robust 25-liter chemical-resistant tank and a high-pressure pump system, it is designed for the precise delivery of pesticides, herbicides, and fertilizers. The unit includes an ergonomic backpack harness and adjustable engine controls to ensure operator comfort and performance consistency across large-scale farm or orchard applications.

Technical Specifications

Working Pressure

15 MPa

Minimum Pressure

25 MPa

Maximum Pressure

Tank Capacity	25 L
Net Weight	10.5 KGS

Physical Dimensions

Dimensions (L x W x H)	41 x 34 x 63 cm
