

Gasoline Brush Cutter with 32.8cc Displacement

This brush cutter features a simple structure and is flexible to carry. It is equipped with a stable gasoline engine, which provides low fuel consumption and minimal noise.

ADDITIONAL IMAGES

Overview

The brush cutter features a durable cutting head and ergonomic design for efficient clearing of thick grass and brush.

Versatile Vegetation Management

The 139C brush cutter is a portable and flexible solution designed for clearing dense vegetation, trimming grass, and maintaining landscapes. Featuring a simple yet robust structure, it is equipped with a stable gasoline engine that ensures low fuel consumption and reduced noise levels during operation. This tool is ideal for both professional landscaping and home use, particularly when working around tree roots, in forests, or on small lawns.

Performance Highlights

Performance Metrics

0.7 kW

Engine Power

32.8 cc

Displacement

0.65 l/h

Fuel Consumption

Engine Specifications

Engine Type	Gasoline engine
Displacement	32.8 cc
Fuel Consumption Rate	0.65 l/h

Physical Characteristics

Mounting Style	Side-mounted
Operating Weight	9-10 kgs

Applications

Recommended Applications

- Cutting shrubs and weeds in forests
- Mowing small lawns
- Working around tree roots
- Plant protection
- Garden maintenance

Technical Features

Core Features	Low Noise, Portable, Flexible, Stable Engine, Ergonomic Design
Drive System	Driving shaft with moving blade
