

Gasoline Brush Cutter

This brush cutter is designed for clearing dense vegetation, brush, and weeds. It features a powerful gasoline engine and a durable cutting head.

Product Overview

Professional Gasoline Brush Cutter

This robust gasoline brush cutter is engineered for high-efficiency vegetation management in agricultural, landscaping, and forestry environments. It features a powerful 2-stroke engine and a centrifugal clutch system, ensuring reliable power transmission for demanding cutting tasks. Designed with operator comfort and safety in mind, the unit includes an ergonomic handle and adjustable harness, making it suitable for extended professional use.

Technical Specifications

Engine Type	2-stroke gasoline engine
Clutch System	Centrifugal clutch
Construction Materials	Lightweight Aluminum Frame, Durable Cutting Head

Features

Key Features

- Ergonomic handle design
- Adjustable harness for comfort
