

Gasoline Concrete Scarifier

The Concrete Scarifier is a powerful and efficient machine designed for surface preparation, coating removal, and concrete grinding. It delivers consistent performance for demanding applications with its adjustable depth control.

Product Overview

Professional Surface Preparation

The CES-200 Gasoline Concrete Scarifier is a robust and versatile solution designed for demanding surface preparation tasks. Engineered for efficiency, this machine excels at coating removal, concrete grinding, and surface leveling on concrete, asphalt, and steel. Its reliable gasoline engine ensures consistent, high-performance operation for professional contractors.

Technical Capabilities

Compatible Cutters

- Hardened steel cutters
- Tungsten carbide tipped cutters
- Tungsten carbide milling flails

Suitable Surfaces

Concrete, Asphalt, Steel

Performance Features

Power Source

Gasoline Engine

Depth Control

Yes
