

Gasoline Engine EM420L-A for Power Generation

The EM420L-A is a robust and reliable gasoline engine designed for a variety of power generation applications. This engine features a durable construction and efficient design, providing consistent performance and long-lasting operation.

Overview

High-Performance Gasoline Engine

The EM420L-A is a robust and reliable gasoline engine engineered specifically for power generation and demanding industrial applications. It features a durable construction paired with an optimized combustion system to ensure consistent performance and a long service life. Designed for ease of use and maintenance, this engine is an ideal power source for generators, water pumps, and other heavy-duty equipment.

Technical Specifications

Rated Power

16 HP

Horsepower

Key Features

Easy Starting, Low Fuel Consumption, Optimized Cooling, Durable Construction

Compliance & Standards

Compliance

Emission Standards Compliant

Applications

Suitable Applications

- Power Generation
- Water Pumps
- Industrial Machinery
