

Gasoline Engine for Agricultural Machinery

This gasoline engine converts mechanical energy from renewable sources into electrical energy. It is suitable for general generator sets, driven by turbines or internal combustion engines.

Product Overview

High-Performance Agricultural Engine

The TP168F is a robust and reliable gasoline engine specifically designed for demanding agricultural machinery applications. Engineered for easy starting and low maintenance, it features a durable construction that ensures long-term operational longevity. Its compact design and efficient combustion system provide the versatility and power required for a wide range of agricultural tasks.

Technical Specifications

Model Identifier	TP168F
Engine Type	Gasoline

Key Features

Key Components

- High-capacity air filter
- Fuel-efficient carburetor
- Sturdy crankshaft

Features	Easy Starting, Low Maintenance, Durable Construction, Efficient Combustion, Compact Design
