

Gasoline Engine for Industrial and Machinery Applications

High-performance gasoline engine designed for various industrial and machinery applications. Features a robust construction for durability and long-lasting performance.

Overview

High-Performance Industrial Gasoline Engine

This 4-stroke OHV gasoline engine is engineered for demanding industrial and machinery applications, offering a balance of power and efficiency. With a displacement of 337ml and a robust single-cylinder, forced air-cooled design, it provides reliable performance for equipment such as generators and water pumps. The unit features flexible starting options and optimized fuel consumption, making it a dependable choice for professional use.

Engine Specifications

Engine Type	4-stroke OHV single-cylinder, forced air-cooled
Displacement	337 ml
Bore x Stroke	82 x 64 mm
Compression Ratio	8:1

Performance Metrics

Power and Torque

8.1 kW Max Power Output	6.3 kW Rated Power Output	20 N.m Max Torque
Min. Oil Consumption	374 g/kW.h	

Operational Features

Starting System	Recoil Start, Electric Start
Air Cleaner Model	Semi-dry or oilbath
Ignition System	Induction Ignition

Physical Dimensions

Weight

Type	Weight (kg)
Net Weight	30
Gross Weight	32
Dimensions (LxWxH)	490 x 430 x 530 mm

Logistics

Engine Oil Capacity	1.1 L
20FT Container Capacity	236 sets
