

Gasoline Engine for Power Generation

This gasoline engine is engineered for applications within the electric power transmission and distribution sector. It delivers reliable power and efficient operation for generators, pumps, and other equipment.

Overview

High-Performance Gasoline Engine

This gasoline engine is specifically engineered for reliable power generation and versatile industrial applications. Featuring a robust construction and an optimized combustion chamber, it delivers enhanced fuel efficiency and consistent performance. It is an ideal solution for powering generators, pumps, and other essential equipment requiring dependable mechanical power.

Technical Specifications

Power Output

6.5 HP

Horsepower

Model Identifier

YH1P65F

Trade Information

Payment Terms

L/C, T/T

Minimum Order Quantity

1 - 99 Units

Lead Time

30 days

FOB Port

Chongqing port
