

Gasoline Engine Generator

This gasoline-powered engine generator ensures a reliable power supply. It features a robust CHV engine, brushless design, and oil warning system for enhanced durability and safety.

Overview

Professional Grade Gasoline Generators

These 4-stroke OHV gasoline engine generators provide reliable, stable power for professional and residential environments. Designed with a compact, robust structure, they feature an integrated oil warning system and automatic overload protection to ensure equipment longevity. Ideal for shops, offices, and homes, they offer excellent fuel efficiency and quiet operation for demanding power requirements.

Performance Metrics

Key Performance Indicators

6 kW

Maximum Output

1 cos Φ

Power Factor

Technical Specifications

Generator Model Data

Model	Rated Output (kW)	Max Output (kW)
YL1700F	1.3	1.43
YL2700F	2	2.2
YL4700F(E)	3.5	4
YL6700F(E)	5	5.5

Engine Features

4-stroke, OHV, Air cooled, Non-contact transistorized ignition

Safety & Control

Safety Systems

- Automatic overload protection
- Automatic engine shut-down on overload
- Oil warning system

Utility

Recommended Applications

Offices • Shops • Houses • Restaurants
