

Gasoline Engine High-Pressure Washer

This high-pressure washer is powered by a gasoline engine for robust performance. Mounted on a wheeled frame, it offers easy portability for various cleaning tasks.

Overview

Heavy-Duty Cleaning Performance

This gasoline-powered high-pressure washer is engineered for demanding cleaning applications, offering robust performance for both commercial and residential environments. Mounted on a durable, wheeled frame, the unit ensures excellent portability across various job sites and terrains. Featuring an air-cooled, four-stroke engine, this washer delivers the consistent power required to tackle tough grime and debris efficiently.

Technical Specifications

Engine Type	Air-cooled, four-stroke gasoline engine
Model Identifier	DQ24A

Design & Build

Build Quality

Protective Frame • Heavy-Duty Assembly

Portability	Wheeled Frame, Easy Maneuverability, Portable Design
