

Gasoline Engine Power Sprayer on Stretcher Frame

This high-pressure power sprayer unit is mounted on a stretcher-type frame. It features a gasoline engine coupled to a pump, designed for spraying applications.

Product Overview

High-Pressure Stretcher Power Sprayer

This high-pressure power sprayer is engineered for demanding spraying applications, featuring a robust gasoline engine coupled with a reliable pump system. Mounted on a durable stretcher-type frame, the unit is designed for enhanced portability and stability during operation. It comes fully equipped with essential components, including a fuel tank, air filter, and a pressure regulator, making it a ready-to-use solution for professional spraying tasks.

Technical Specifications

Power Source	Gasoline Engine
Frame Design	Stretcher Frame

Key Features

Operational Benefits

- High-pressure output for effective spraying
- Portable stretcher frame design
- Stable operation during use
- Integrated plumbing and delivery system

Included Components	Gasoline Engine, High-Pressure Pump, Pressure Regulator, Fuel Tank, Air Filter, Stretcher Frame
