

Gasoline Engine Self-Priming Centrifugal Water Pump

This self-priming centrifugal water pump is designed for efficient water transfer. Its robust gasoline engine provides reliable power for irrigation, construction, and general water pumping applications.

Product Overview

Professional Water Transfer Solution

This gasoline-powered self-priming centrifugal water pump is engineered for heavy-duty water transfer tasks. Built with a robust engine and mounted on a protective tubular frame, it offers exceptional mobility and durability in rugged environments. It serves as an ideal solution for irrigation, construction site dewatering, and general-purpose water management.

Technical Specifications

Engine Power

| | |
|----------------------------|--------------------------------|
| 5 HP Rated Power | 3600 RPM Rated Speed |
|----------------------------|--------------------------------|

Pump Type

Self-priming centrifugal

Suitable Applications

Irrigation, Construction, Water Transfer

Design and Build

Build Features

- Protective carry frame
- Gasoline-powered engine
- Centrifugal pumping mechanism
- Portable design
