

Gasoline Engine Tiller Cultivator

This tiller cultivator features a light weight, small volume, and simple structure. Engine power is driven by gear.

Product Overview

Versatile Soil Preparation

The gasoline engine tiller cultivator is engineered for efficient soil cultivation in gardens and small agricultural fields. It features a robust 159cc engine that provides high torque, making it suitable for various soil types and conditions. With adjustable furrow widths and depths, this machine offers the flexibility required for professional soil management and precise bed preparation.

Engine Specifications

Performance Metrics

159 CC Displacement	5 HP Max Output	3600 rpm Max Output Speed
-------------------------------	---------------------------	-------------------------------------

Fuel Capacity	1 L
---------------	-----

Operational Capabilities

Tilling Dimensions

Parameter	Value
Furrow Breadth	350/650/850 mm
Working Depth	300 mm
Tine Rotate Diameter	315 mm

Gearbox	F1/N
Output Rotation Speed	150 rpm

Logistics and Design

Net Weight	55 kg
Packing Size	770x416x750 mm
40'GP Load Capacity	252
