Product Overview

Professional Water Transfer Solution

This gasoline-powered water pump is a robust, portable unit designed to handle demanding fluid transfer tasks in agriculture, construction, and emergency settings. Featuring self-priming capabilities and a durable protective frame, it ensures reliable operation in challenging field environments. With an impressive flow rate, it provides an efficient solution for large-scale irrigation and rapid water removal needs.

Performance Specifications

Maximum Flow Rate

1000 L/min

Max Flow Rate

Outlet Diameter 3 inch

Priming Capability Self-priming

Design & Utility

Power Source Gasoline Engine

Key Features Portable, Protective Frame, Durable Construction

Application Suitability

Typical Applications

- Agricultural Irrigation
- Construction Site Dewatering
- General Water Removal
- Emergency Flood Control
