Product Overview

High-Performance Gasoline Water Pump

This 3-inch gasoline engine water pump is designed for reliable and efficient water transfer across various professional applications, including irrigation and construction. Powered by a robust 6.5 HP, 4-stroke engine, it delivers an impressive flow rate of up to 1000 liters per minute. The unit features a durable forced air-cooled design and a protective frame, ensuring stable performance and ease of transport in demanding environments.

Performance Metrics

Max Capacity

1000 L/min
Max Capacity

28 m
Total Lift

8 m
Max Suction

Engine Specifications

Engine Configuration

Feature	Specification
Engine Model	TE160
Engine Type	4-stroke, OHV, Forced air-cooled
Max Output	5.5 HP
Displacement	163 cc
Ignition	Non-contact transistorized (T.C.I)

Technical Specifications

Capacities

- Fuel Tank: 3.6 L
- Oil Capacity: 0.6 L

Inlet/Outlet Size	80 mm
-------------------	-------

Noise Level	65 dB
-------------	-------

Logistics

Package Dimensions	510 x 390 x 460 mm
--------------------	--------------------

Gross Weight	29.4 Kg
--------------	---------

20' FCL Capacity	415 pcs
