Product Overview

High-Performance Gasoline Water Pump

This WTM series water pump is engineered for efficient water transfer in demanding environments such as irrigation, construction sites, and emergency water removal. It features a robust gasoline engine designed for economical operation and reliable, high-output performance. The unit is built with a special alloy frame that ensures both portability and durability, making it an ideal solution for remote working areas where power access is limited.

Performance & Features

Key Features

- Economical engine operation
- Special alloy frame for reduced weight
- Optimized self-suction structure
- Extended-capacity fuel tank for remote work

Applications

Irrigation, Construction, Emergency Dewatering, Field Work

Technical Details

Safety Note

Do not run dry

Engine Model

WT168F

Series

WTM
