

Gasoline Engine Water Pump

This water pump is designed for various water transfer applications. It features a gasoline-powered engine for reliable operation in remote locations.

Product Overview

Professional Water Transfer Solution

This 2-inch gasoline-powered water pump is engineered for high-performance water transfer in demanding environments. Equipped with a reliable 4HP engine, it provides the power necessary for irrigation, construction site dewatering, and emergency water management. Its portable design ensures consistent operation even in remote locations where external power sources are unavailable.

Technical Specifications

Engine Model	GX120
Power Output	4 HP
Pump Inlet/Outlet Diameter	2 inches

Application Areas

Primary Applications	Irrigation, Construction, Emergency Water Removal
