

Gasoline Engine Water Pump for Irrigation and Drainage

This water pump is engineered for high-performance water transfer in agricultural and industrial applications. It delivers exceptional pumping capacity and reliable operation due to its powerful gasoline engine.

Product Overview

High-Performance Gasoline Engine Water Pump

This robust gasoline-powered water pump is engineered for high-performance water transfer in agricultural and industrial settings. Designed for reliability and power, it offers an effective solution for irrigation and drainage tasks. Its durable construction ensures consistent operation and longevity, even when used in demanding environments.

Technical Specifications

Performance Features

- Exceptional pumping capacity
- Durable heavy-duty construction
- Reliable operation in demanding environments

Model Identifier	HS-QGZ80
Primary Applications	Agricultural Irrigation, Industrial Drainage, General Water Management
Engine Type	Gasoline
