

Gasoline Gear Tiller for Soil Cultivation

This gasoline gear tiller is a robust machine designed for soil cultivation. It features a gear-driven transmission for reliable power and adjustable tilling depth for versatile use.

Overview

Versatile Soil Cultivation

This gasoline-powered gear tiller is designed for efficient soil preparation in diverse agricultural environments. Featuring a robust 170 gasoline engine with a reliable recoil start system, it provides consistent power for demanding cultivation tasks. Its versatile gear transmission, including two forward gears and one reverse gear, ensures excellent maneuverability and control in both dry land and paddy fields.
