

# Gasoline Generator SD10000E

The SD10000E is a gasoline-powered generator that delivers reliable electrical power. It features a durable frame with wheels, multiple AC outlets, a voltmeter, and safety features like overload protection and low oil shutdown.

## Overview

### Reliable Power Solution

The SD10000E is a robust gasoline-powered generator engineered to deliver dependable electrical power for various professional and emergency applications. Designed with a durable frame and integrated wheels, it offers excellent portability for construction sites and outdoor operations. The unit features essential monitoring tools and safety mechanisms, including overload protection and low oil shutdown, ensuring both equipment longevity and operational safety.

## Technical Specifications

Rated Voltage	220 V
Phase Type	Single phase

## Key Features

### Usability Features

- Durable frame for rugged environments
- Integrated wheels for easy transportation
- Multiple AC outlets
- Integrated voltmeter for output monitoring

Safety Features	Overload Protection, Low Oil Shutdown
-----------------	---------------------------------------

## Applications

### Ideal For

Emergency Backup • Construction Sites • Outdoor Activities
