

Gasoline Inverter Generator

This gasoline inverter generator provides clean and reliable power for various applications. Equipped with advanced inverter technology, it delivers stable AC power suitable for sensitive electronics.

Overview

Clean and Reliable Power

This gasoline inverter generator is engineered to deliver stable, pure sine wave AC output, making it an ideal power source for sensitive electronics. Its closed capsule construction and specialized damping materials ensure exceptionally quiet operation, while the compact, ergonomic design allows for easy transport. Built for versatility, it is suitable for everything from camping and outdoor events to reliable emergency backup power.

Performance

Output Quality	Pure Sine Wave AC
Starting Capacity	Over 50% more than standard

Features

Key Features	Eco-mode, Silent Operation, Compact Design, Pure Sine Wave, Portable
--------------	--

Connectivity

Available Outputs

- Earthed AC Socket
- 12V DC Output

Safety & Maintenance

Safety Systems

Automatic Shut-off • Oil Deficiency Indicator • Overload Protection

Fuel Monitoring	Yes
-----------------	-----

Specifications

Technical Details

Feature	Detail
Starter	Recoil
DC Output	12V 8A
Noise Level	Low
