

Gasoline Plate Compactor

This plate compactor is designed for construction and landscaping applications. It is powered by a gasoline engine and delivers optimal force for soil and asphalt compaction.

Overview

High-Performance Gasoline Plate Compactor

The HZR160 is a robust and efficient compaction machine designed for a variety of construction and landscaping applications. Powered by a reliable gasoline engine, this plate compactor delivers optimal force for effective soil and asphalt compaction. Its durable construction ensures long-lasting performance, while the ergonomic handle provides comfortable operation. This unit is ideal for preparing foundations, pathways, and other surfaces, offering exceptional compaction power and maneuverability.

Model Series

Key Features

Design Highlights

- Reliable gasoline engine power
- Durable construction for long-lasting performance
- Ergonomic handle for comfortable operation
- High maneuverability

Ideal Applications

Soil Compaction, Asphalt Compaction, Foundation Preparation, Pathway Construction
