Overview

High-Performance Compaction

This gasoline-powered plate compactor is engineered for efficient soil and asphalt compaction in construction and landscaping projects. It features an open plate design for self-cleaning and a robust engine to deliver consistent force across granular surfaces. The unit is designed with operator comfort in mind, offering low vibration and a convenient folding handle for efficient transport and storage.

Technical Specifications

Model Number	QTP9655
Operation Weight	79 kg
Plate Size	520x445 mm
Compaction Depth	30 cm
Travel Speed	15 m/min

Performance Metrics

Centrifugal Force

13000 N

Centrifugal Force

Exciter Speed

5500 vpm
