

Gasoline Plate Compactor

This plate compactor is a robust machine designed for soil compaction in construction and landscaping. It features a gasoline engine and heavy-duty steel base plate, ensuring reliable performance and consistent compaction results.

Overview

High-Performance Compaction

The CNP330Y plate compactor is engineered for robust soil compaction in demanding construction and landscaping environments. Featuring a heavy-duty steel base plate and a powerful engine, it delivers consistent force and optimal efficiency for preparing foundations and sidewalks. Designed with user comfort in mind, it includes a vibration-dampening handle system to ensure reliable, long-lasting performance on various job sites.

Performance Metrics

Key Performance Indicators

38 kN Centrifugal Force	4800 vpm Frequency	270 m2/hr Efficiency
-----------------------------------	------------------------------	--------------------------------

Technical Specifications

Engine Configurations

Engine Type	Power (kW/hp)	Weight (kg)
Honda GX390	9.8 (13.0)	260
Chinese Petrol Engine	9.8 (13.0)	275
Chinese Diesel KM186F	6.6 (9.0)	275

Operational Data

- Compaction Depth: 85 cm (33.5 in)
- Travel Speed: 30 cm/s (11.8 in/s)
- Plate Size: 83 x 64 cm (32.7 x 25 in)

Logistics

Shipping Dimensions	90 x 66 x 125 cm (35 x 26 x 49 in)
