

# Gasoline Plate Compactor

This plate compactor features a gasoline power system for a better compaction effect. It has low vibration combined with high compaction performance.

## Product Overview

### High-Performance Compaction

This gasoline-powered plate compactor is engineered for superior soil compaction in construction and landscaping projects. It features an open plate design for self-cleaning and a sealed belt cover to protect internal components from sand and soil. Designed with the operator in mind, it combines high compaction force with low vibration, ensuring efficient and comfortable operation.

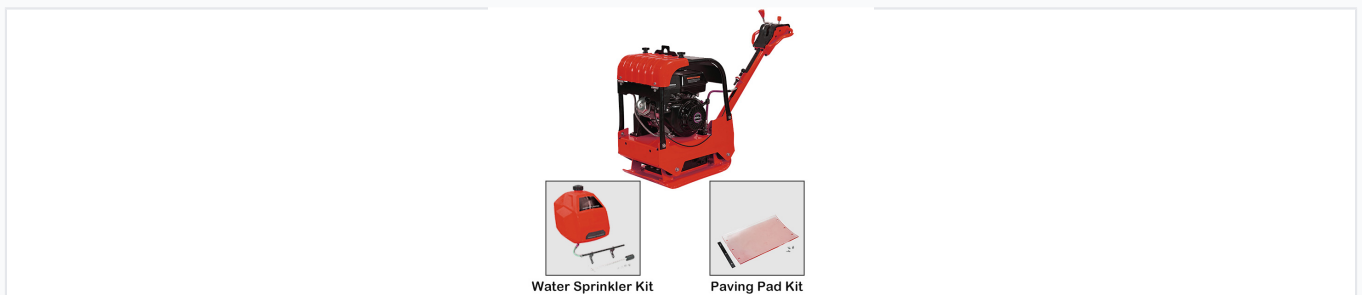

## Key Features

Key Features	Folding handle, Self-cleaning open plate, Sealed belt cover, Low vibration, High compaction force
--------------	---

## Technical Specifications

Plate Size	650x420 mm
Compaction Depth	50 cm
Travel Speed	15 m/min
Centrifugal Force	30500 N
Exciter Speed	4000 vpm

## Power System

The compactor features a robust 270cc engine and supports accessories like a water sprinkler kit and paving pad kit.

### Power Output

- 9.0 HP (Gasoline)
- 6.0 HP (Diesel)
- E-Start

Engine Displacement	270 cc
---------------------	--------

## Weight and Handling

Transportation

Folding handle

Operation Weight

154 kg / 158 kg
