Overview

High-Performance Compaction

This gasoline plate compactor is engineered for demanding construction and landscaping tasks, offering a powerful force for superior compaction results. The open plate design ensures self-cleaning during operation, while the sealed belt cover prevents sand and soil ingress for increased longevity. Designed with operator comfort in mind, the unit features low vibration levels and a folding handle for convenient transportation and storage.

Compaction Depth

21 m/min

Travel Speed

Technical Specifications

Technical Data

Specification	Gasoline Model	Diesel Model
Engine Displacement	389 cc	N/A
Power Output	13 HP	9.0 HP
Operation Weight	255 kg	251 kg

Plate Size: 870 x 670 mm

Features & Accessories

Water Sprinkler Kit

Telescopic wheel

Paving Pad Kit

The plate compactor is compatible with various accessories for specialized tasks, including asphalt work and delicate surface preparation.

Available Accessories

- Water Sprinkler Kit
- Telescopic Wheel Kit
- Paving Pad Kit

Key Features

Folding Handle, Self-Cleaning Open Plate, Sealed Belt Cover, Low Vibration Design, E-Start
