

Gasoline Plate Compactor

This gasoline-powered plate compactor is designed for soil compaction and paving applications. It features a fuel tank, base plate, engine with protective cage, and adjustable controls.

Product Overview

High-Performance Gasoline Plate Compactor

This robust gasoline-powered plate compactor is engineered for demanding construction and landscaping environments. Featuring a durable base plate and a powerful engine protected by a reinforced cage, it delivers consistent compaction force for soil, gravel, and paving applications. The ergonomic handle design includes adjustable controls, ensuring operator comfort and precision during extended use.

Technical Specifications

Engine Type	Gasoline
Primary Applications	Soil Compaction, Paving, Landscaping, Construction

Design Features

Key Design Features

- Reinforced engine protective cage
- Adjustable handle controls
- High-durability base plate
