

# Gasoline Powered Agricultural Sprayer

This gasoline powered sprayer is a portable and versatile machine for spraying pesticides, herbicides and fertilizers. It has a gasoline engine, a high-pressure pump, a hose reel, and a long spray hose and is mounted on a sturdy frame with wheels.

## ADDITIONAL IMAGES

## Product Overview

### High-Efficiency Agricultural Spraying Solution

This portable gasoline-powered sprayer is engineered for professional agricultural and industrial applications, offering reliable performance for the distribution of pesticides, herbicides, and fertilizers. Mounted on a robust, wheeled frame, the unit ensures high maneuverability across diverse terrains such as orchards, vineyards, and open fields. Equipped with a high-pressure pump and an integrated hose reel system, it delivers a consistent spray pattern while maintaining organized and tangle-free hose management.

## Technical Specifications

### Ideal Applications

- Orchards
- Vineyards
- Agricultural Fields
- Gardens
- Industrial Spraying
