

# Gasoline Powered Cargo Tricycle with 250cc Engine

This gasoline-powered cargo tricycle is designed for heavy-duty hauling. It features a 250cc engine, a durable steel frame, and a spacious cargo bed with reinforced railings.

## ADDITIONAL IMAGES

## Overview

### Versatile Cargo Solution

This gasoline-powered cargo tricycle is engineered for heavy-duty commercial transport, offering a robust 250cc air-cooled, 4-stroke engine. Built with a durable steel chassis and reinforced suspension, it is capable of hauling up to 800kgs with ease. The vehicle combines reliability with utility, featuring a spacious 1.8m x 1.3m cargo box, making it an ideal choice for efficient goods distribution in demanding environments.

## Performance

Engine Displacement	250 cc
Engine Configuration	1 cylinder, 4 stroke, air cooled
Transmission	5 forward + 1 reverse
Ignition & Starter	C.D.I Ignition, Electric Start, Kick Start

## Load Capacity

### Maximum Load Capacity

**800 kg**

Payload Capacity

Cargo Box Dimensions	1.8m x 1.3m (flowered bottom)
