

Gasoline Powered Chain Saw for Wood Cutting

This gasoline-powered chain saw is designed for cutting wood. It is suitable for felling trees, limbing, and cutting firewood.

Product Overview

High-Performance Gasoline Chainsaw

This professional-grade gasoline-powered chainsaw is engineered for efficient wood cutting, felling, and limbing operations. Designed with a robust engine housing and a precision guide bar, it provides the necessary power and control for demanding tasks like cutting firewood or managing forest maintenance. Its ergonomic handle ensures operator comfort and control during extended use.

Technical Specifications

Key Features

- Durable engine housing
- High-performance guide bar
- Ergonomic handle design
- Toothed chain for precision cutting

Power Source	Gasoline
Primary Applications	Tree Felling, Limbing, Firewood Cutting
