

Gasoline Powered Chainsaw

This chainsaw is powered by gasoline and suitable for agricultural, gardening, and orchard tasks, as well as firewood preparation. It is particularly effective for cutting medium-sized wood.

Overview

Professional Performance

This high-performance gasoline-powered chainsaw is engineered for demanding cutting tasks in forestry, landscaping, and construction. It features a robust engine designed for reliable power and efficient operation, ensuring consistent performance on the job site. With an ergonomic design to reduce operator fatigue and integrated safety systems like a chain brake and anti-vibration technology, it is built for professional-grade productivity.

Technical Specifications

Model Number	NT5800
