

Gasoline Powered Chipper Shredder

This chipper shredder is designed for processing yard waste and small branches. It features a gasoline engine for efficient chipping and shredding.

Overview

High-Performance Chipper Shredder

The SU-1003 is a robust gasoline-powered machine engineered for efficient processing of yard waste and small branches. Designed for both homeowners and professional landscapers, it significantly reduces debris volume to create useful mulch. With a focus on safety and mobility, this unit features a large hopper for easy material feeding and is mounted on wheels for superior maneuverability around the job site.

Technical Specifications

Model Number	CH-1003
Power Source	Gasoline Engine

Safety & Compliance

Safety Features	Protective Guards, Emergency Shut-off, Warning Labels
-----------------	---

Design & Utility

Ideal Applications

- Yard waste reduction
- Branch chipping
- Mulch creation

Portability	Yes
