

Gasoline Powered Concrete Surface Finishing Screed

This surface finishing screed is designed for leveling and smoothing concrete surfaces. Powered by a gasoline engine, it offers portability and ease of use on various construction sites.

Overview

Professional Concrete Finishing

This gasoline-powered concrete surface finishing screed is designed for high-efficiency concrete leveling and smoothing. Featuring a lightweight design for portability, the unit utilizes uniform vibration to enhance concrete compaction and deliver a superior finish compared to traditional methods. Its adjustable handle and robust, hard-end aluminum blade make it an essential tool for demanding construction sites.

Technical Specifications

Core Features

- Emergency stop switch
- Adjustable handle height and angle
- Tilt-up engine stand
- Hard-end aluminum blade
- Heavy rubber vibration dampeners

Total Weight	12 kg
Power Source	Gasoline Engine

Performance

Efficiency Stats

4 times faster
Compaction Efficiency

Operational Advantages	Low Maintenance, Portable, Easy Operation, Uniform Vibration
