

Gasoline Powered Demolition Jackhammer

This gasoline powered jackhammer is a portable demolition tool for breaking concrete, asphalt, and other hard materials. It offers cordless operation and durable construction for demanding environments.

Overview

High-Performance Demolition Power

This gasoline-powered demolition jackhammer is a robust and portable solution designed for heavy-duty breaking tasks on concrete, asphalt, and other hard surfaces. Engineered for maximum mobility, its cordless gasoline operation allows for unrestricted use across diverse job sites without the need for external power sources. With a high-impact mechanism and ergonomic design, it delivers reliable performance for construction, road repair, and demolition professionals.

Technical Specifications

Power Source	Gasoline Engine
Model Identifier	1E45F-3A

Key Features

Design Highlights

Portable • Cordless • High-Impact • Ergonomic

Compatibility

- Multiple tool attachments included
- Versatile for various material types

Suitable Applications	Concrete Breaking, Asphalt Removal, Road Repair, Construction, Demolition
