

Gasoline Powered Earth Auger

This gasoline powered earth auger is designed for digging holes for tasks such as planting or installing fences. It features an effective anti-vibration system and automatic oil lubrication.

Product Overview

High-Performance Earth Auger

This gasoline-powered earth auger is an efficient tool designed for rapid hole digging in various ground conditions. Featuring a robust 51.7cc engine and a 1600W power output, it provides the necessary torque for tasks such as planting trees, installing fence posts, and landscaping. Its ergonomic construction ensures comfortable operation for professionals, while the durable auger bit allows for consistent performance in tough soil.

Technical Specifications

Engine Displacement

51.7 cc

Displacement

Maximum Power

1600 W

Max Power

Ignition System

C.D.I

Fuel Mixture Ratio

25:1

Drilling Capabilities

Bit Diameter Range

80mm - 200mm

Bit Length

800 mm

Physical Characteristics

Total Weight

13.5 kg
