

Gasoline Powered Earth Auger

This earth auger is designed for efficient drilling in soil and ground. It features a gasoline engine, ergonomic handles and a durable auger bit for creating holes for planting and landscaping.

Product Overview

Professional Earth Auger

This gasoline-powered earth auger is designed for efficient and rapid drilling in various soil types. Featuring a robust 2-stroke engine and high-strength steel drill bits, it is an ideal tool for landscaping tasks such as planting, fence post installation, and soil sampling. The design prioritizes operator comfort with ergonomic handles and vibration dampening technology, ensuring reliable performance for demanding projects.

Engine Specifications

Engine Model	WL1E44F-5B
Engine Type	2-stroke, Air-cooled, Gasoline
Cylinder Displacement	51.7 cc

Performance

Power Rating

1.5 kW
Power

7500 rpm
Rated Speed

Idling Speed	3000 rpm
Speed Ratio	30:1

Fuel System

Gas/Oil Mix Ratio	40:1
Fuel Tank Capacity	1 L

Physical Characteristics

Engine Net Weight	9.6 kg
Total Weight (with 8" drill)	14.4 kg
